"CATCHING THE LIGHT"

WWW.JANINEHOFFMANART.COM

Are you ready to try something different? Colored pencil drawing is becoming one of the most popular mediums in the art world. Its portability and clean up time are part of the allure, but it's the wonderful results one gets that has put these pencils on the radar. In this workshop, we will explore creating transparency and light, which are some of the most popular ways the medium is used. Through layering techniques, students learn to create intense colors as well as incredible detail that a painting could not achieve.

Colored Pencil
